Portfolio: sayantanee-2310.github.io/Sayantanee_Web_Portfolio

CAREER OBJECTIVE

Motivated software engineer with a solid foundation in Java and ML, currently completing a BTech in Computer Science with hands-on exposure to full-stack development, machine learning, and AI. Seeking to contribute to a dynamic organization that values continuous skill development and innovation.

SKILLS

Java • MySQL (DBMS) • Data Structures & Algorithms • Machine Learning • React & Node.js • Git & GitHub

- Problem Solving

EXPERIENCE

Intern & Participant - Asian Institute of Technology (AIT), Thailand

Global Innovation Program

- Participated in an international innovation program organized by AIT, Thailand, collaborating on cross-cultural problem-solving initiatives.

Intern - Primetals Technologies

Level 2 Steel Automation Project

- Contributed to a Level 2 Steel Automation project focused on enhancing production data tracking and process visibility in a steel plant environment.

PROJECT WORK

Hospital Management System

- Developed a full-stack system using MongoDB, Express.js, React.js, and Node.js to manage patients, doctors, and appointments.

E-Learning Site Development

- Built a full-stack e-learning platform featuring user authentication, course catalogue filtering, and secure checkout.
- Integrated video lesson streaming and real-time student progress tracking.
- Optimized backend database queries and implemented responsive UI designs for mobile and desktop views.

Image Caption Generator (Hybrid Model)

- Built an image captioning system using InceptionV3 and MobileNetV2 (hybrid model) with LSTM for caption generation.

Desktop-Based CRUD Application

- Developed a Java Swing desktop application integrated with a MySQL database for managing steel production records.
- Handled JDBC integration, query optimization, and exception handling.
- Gained exposure to manufacturing process automation, real-time data handling, and system-level software development within a production environment.

Resume Screening System

- Built a Python-based system that predicts a suitable job role from an uploaded resume's skill set using NLP.

EDUCATION

Guru Nanak Institute of Technology, Kolkata - BTech in Computer Science and Engineering - CGPA: 8.5

2026

Taki House Government Sponsored Girls' High School, Kolkata - Higher Secondary Examination — 80.60%

Taki House Government Sponsored Girls' High School, Kolkata - Secondary Examination — 85.42%
